

Support Their Safe Return

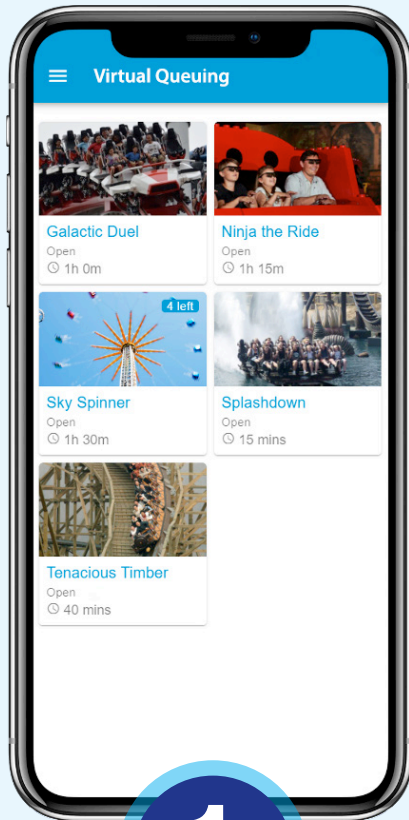

Your guests are already planning for all the memories they'll make when your front gates are open again. Help them feel more comfortable by minimizing crowded queues around your most-loved attractions!

In an effort to support our industry as we work to move towards more normal operations, **accesso** is offering its unique virtual queuing solution to any park interested in replacing the physical queue lines at their most popular attractions. With our virtual queuing technology, your park can move guests away from high traffic areas on site, reducing crowding and empowering them to more easily follow social distancing protocols as outlined by leading health organizations around the globe.

Using guests' own smartphones, our **QsmartSM** virtual queuing solution will allow your guests to virtually reserve a place in line for their favorite rides. When it's their turn, they can present their device at the ride to board, reducing long lines to more manageable buffer queues. Should smartphones not be allowed on rides, options are available whereby reservations can be transferred to alternative media types or wearable wristbands.

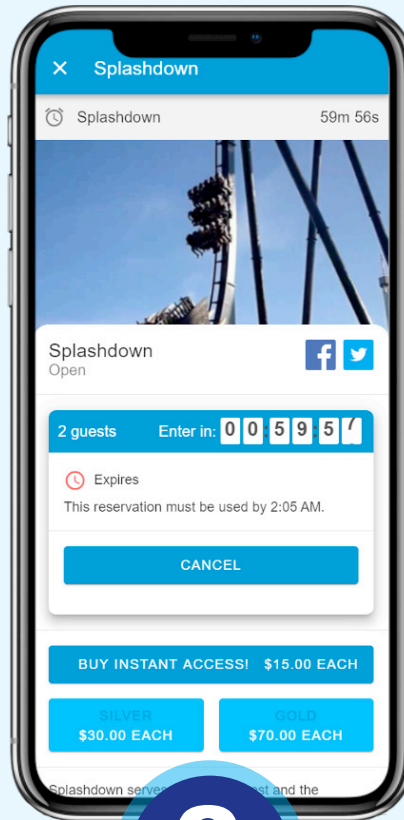

With 20+ years of industry experience and virtual queuing expertise, **accesso** is uniquely suited to assist your park as you invite guests to return. We hope this service will allow you to provide your guests with a safer visit and more peace of mind.

Three Simple Steps to Safer Queues

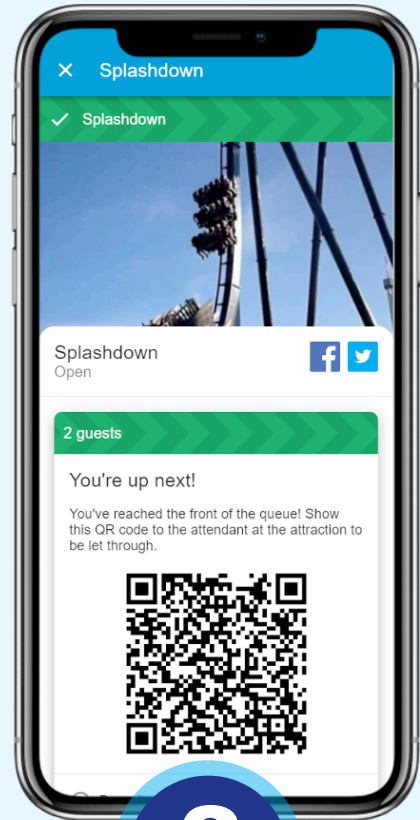

1

Upon arrival at your park, guests can scan a QR code to log in to the **Qsmart** platform (no app download necessary). Guests can then view wait times and reserve their rides.

2

Once guests reserve a ride, they queue virtually and can monitor a countdown to their turn to ride. By waiting virtually instead of in a physical line, guests can more easily comply with social distancing protocols.

3

When it's their turn to ride, guests are notified to proceed to the ride's buffer queue. Park attendants may then scan the QR code on the guest's smartphone to redeem the ride reservation.

Our **accesso** team cares deeply about supporting our industry in this challenging time, and would love to help you welcome back your guests with thoughtful precautions to protect their wellbeing. If you'd like to learn more, please contact us at queuesafer@accesso.com.

At **accesso**, we understand that technology is critical to our clients' success and the happiness of their guests. No business should have to settle for technology that creates more issues than it solves! Technology should be the solution, not the problem. Our clients need powerful technology solutions to grow their businesses and create connected guest experiences – and **accesso** delivers! That's why over 1,000 venues in 30 countries have chosen to partner with us. Our patented and award-winning solutions drive increased revenue for attraction operators, improving the guest experience while helping our clients streamline operations and harness the power of data to educate business and marketing decisions.
